

MNR Exports Pvt Ltd

METAL POLICY

MNR Exports has established a policy for dealing with the metallic objects used in the factory namely, needles and scissors. We have a separate policy for needles which is available in the HSE Manual.

The policy for scissors is as follows:

- Issue of scissors is supported with documentation, and after usage they are submitted.
- Spare scissors are not allowed to be kept lying in places.
- Wearing of rings/chains or any metallic ornaments are strictly prohibited.
- Putting of Metal gloves is a must during cutting.
- The organization is using a needle detector, to track whether any of the bags contain broken parts of the needles or not.
- Process of Usage of a needle Detector:
- Needle detector machine shall be placed in a separate area allotted only for this purpose.
- Each & every bag is passes through the machine.
- Incase any needle is detected, the indicator will start functioning.
- Then, the defective bag shall be checked thoroughly and the needle/part shall be removed.
- The same process will be carried out for every bag.
