

MNR Exports Pvt Ltd

PEST CONTROL POLICY

MNR Exports has established a policy for dealing with pests present in the factory.

A specific trained employee is responsible for spraying Pesticides at regular intervals for the operation.

The process of pest control is as follows:

- Pesticides solution according to the manufacturer's instruction is filled up in the sprayer.
- This is sprayed at every corner of the factory to control specially in the areas prone to.
- The process takes places every week.
- Maintenance of the sprayer and refilling of the same are as and when required.
- Documentation of the same is done every time the process occurs.
